Farnham School News

Nursery

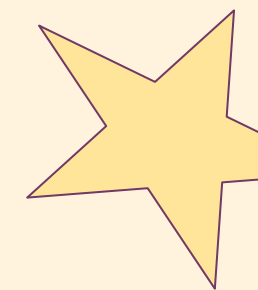

In nursery this week we have been reading the story
“Naughty Bus”.

In the story he gets up to lots of naughty things like not stopping for
his passengers and driving across someone's dinner,
what a naughty bus!

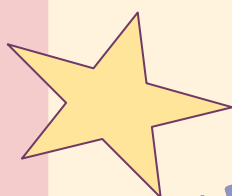

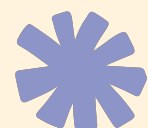

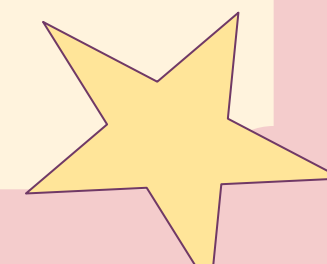

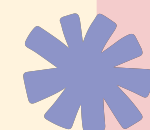

Reception

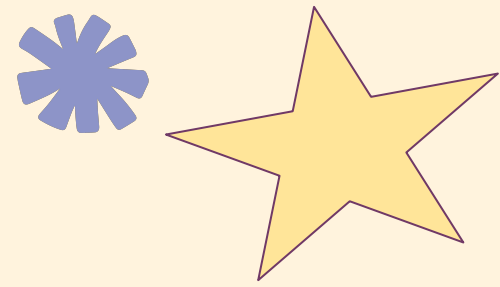

This week, Reception have been learning all about Bonfire Night and how to stay safe during the celebrations. We carried out an exciting science experiment, creating our own “firework” using Coke and Mentos!

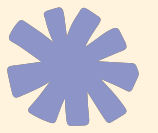

We’ve also started exploring the role of a vet, inspired by our new story Mog and the Vet. The children have really enjoyed learning how vets help to care for animals.

Recently, the class have shown a big interest in birthdays, so we’ve been busy making birthday cards and writing our own party invitations together.

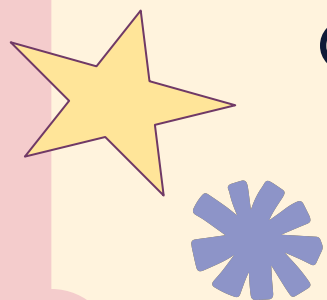

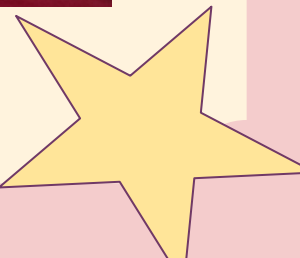

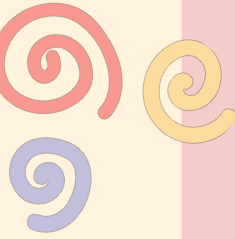

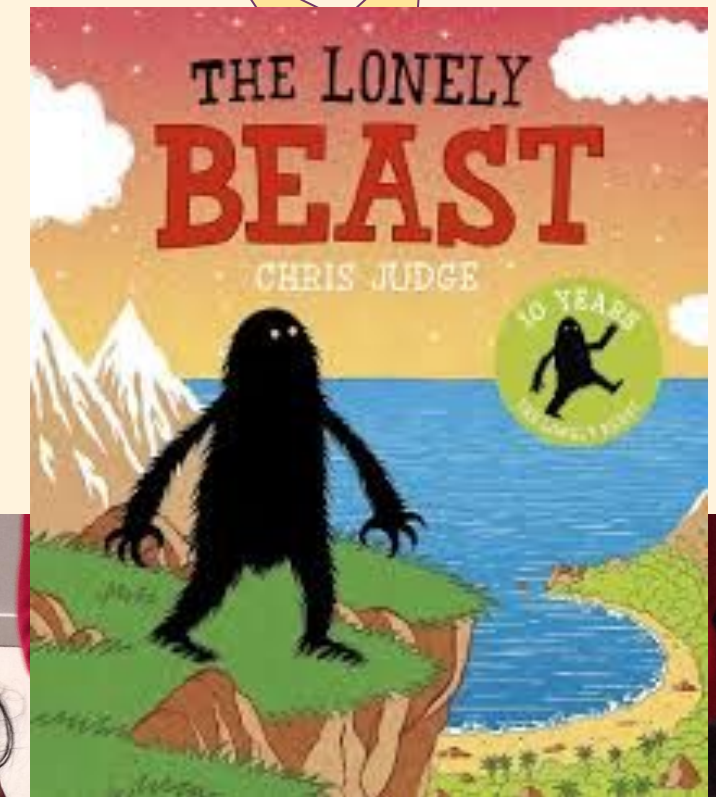

Year 1

In English, we have enjoyed starting our new book 'The Lonely Beast' by Chris Judge. We drew our own beasts and labelled/wrote about them using our phonic knowledge.

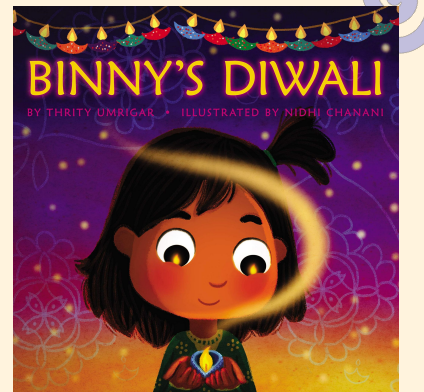

In maths, we have been subtracting within 10. We used 10 frames and ones. We have also been finding a part using part whole models.

In geography, we have been learning about aerial photographs and labelling a photograph of our local area around school.

Year 2

In English we have been reading our new story called 'Binny's Diwali'. We have tasted some yummy sweets 'Jalebi' and learned what verbs are.

In maths we have also been having lots of fun learning about weight. We have predicted which objects are lighter or heavier and weighed them using cubes. We know just because something is bigger does not mean it will be heavier.

In science we have started our learning on Microhabitats and explored which minibeasts we could find in leaf litter. We found beetles, worms and spiders!

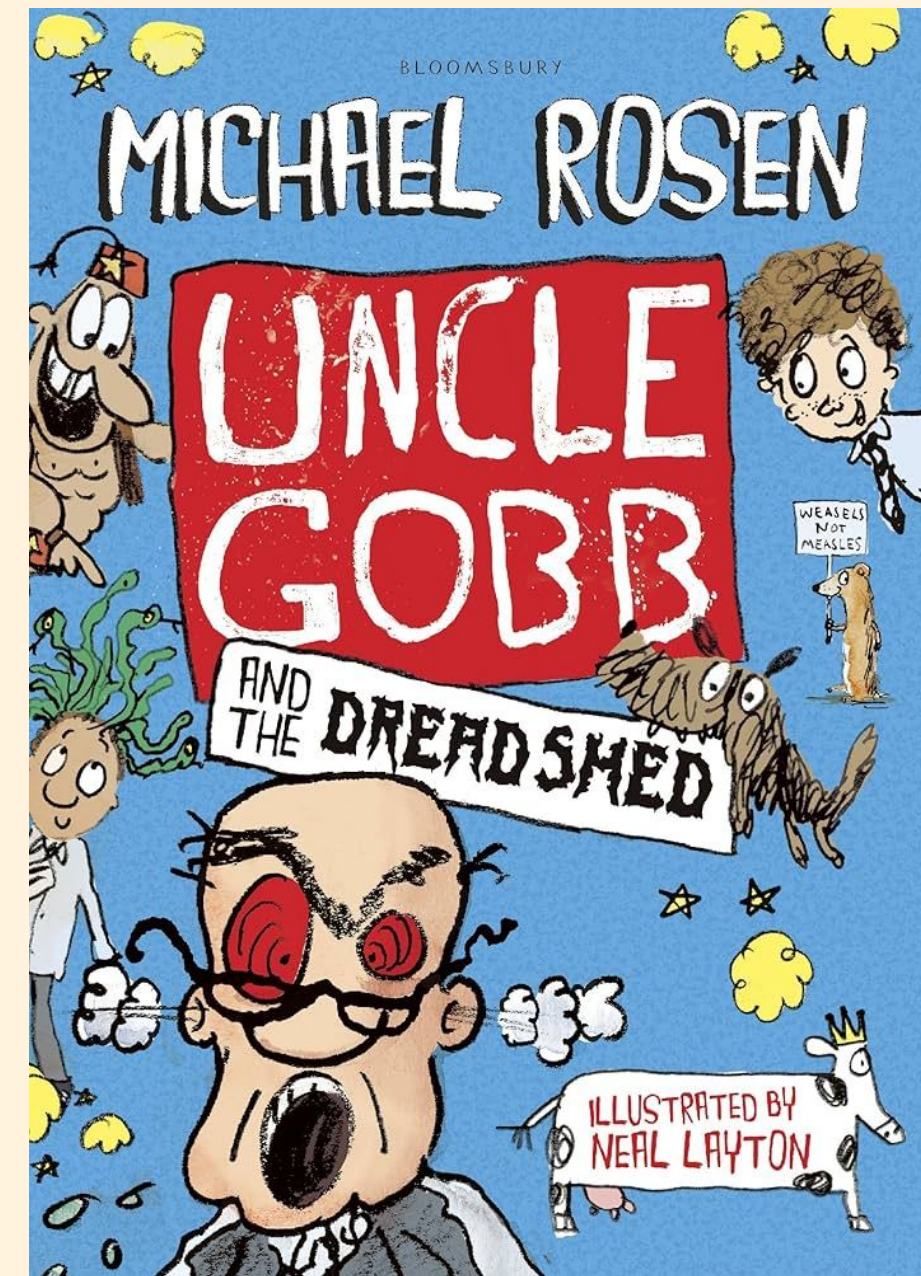

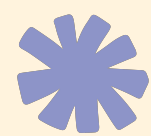

Year 3

In maths, we have begun to look at subtraction involving exchanges. We have found it tricky but we have persevered.

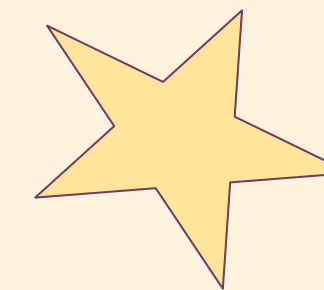

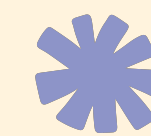

In our reading lessons, we have started to read Uncle Gobb and the dread shed by Michael Rosen. We are really enjoying it so far.

In science we have started our new topic about rocks and soils. We are excited to link this to our new geography topic about volcanoes.

Year 4

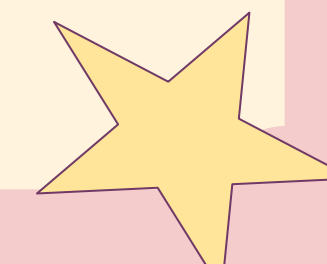

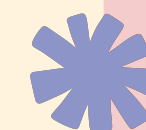

In reading, we have started our new book called 'The Wonder Brothers' which is all about magicians and the Blackpool Tower. We are very interested to see what happens next!

In maths, Miss Earp and Mrs Thewlis have been blown away by how confident we are becoming in rounding numbers to the nearest 10, 100 and 1000. Well done, year 4!

In science, we have started our new topic on electricity and we have started to look at the difference between mains electricity and batteries.

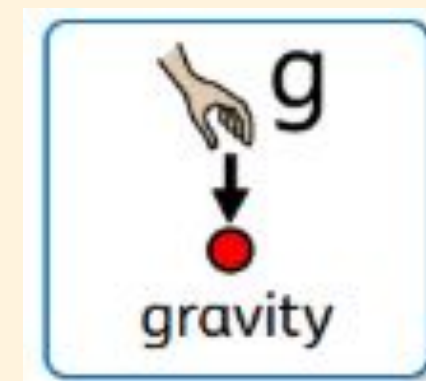

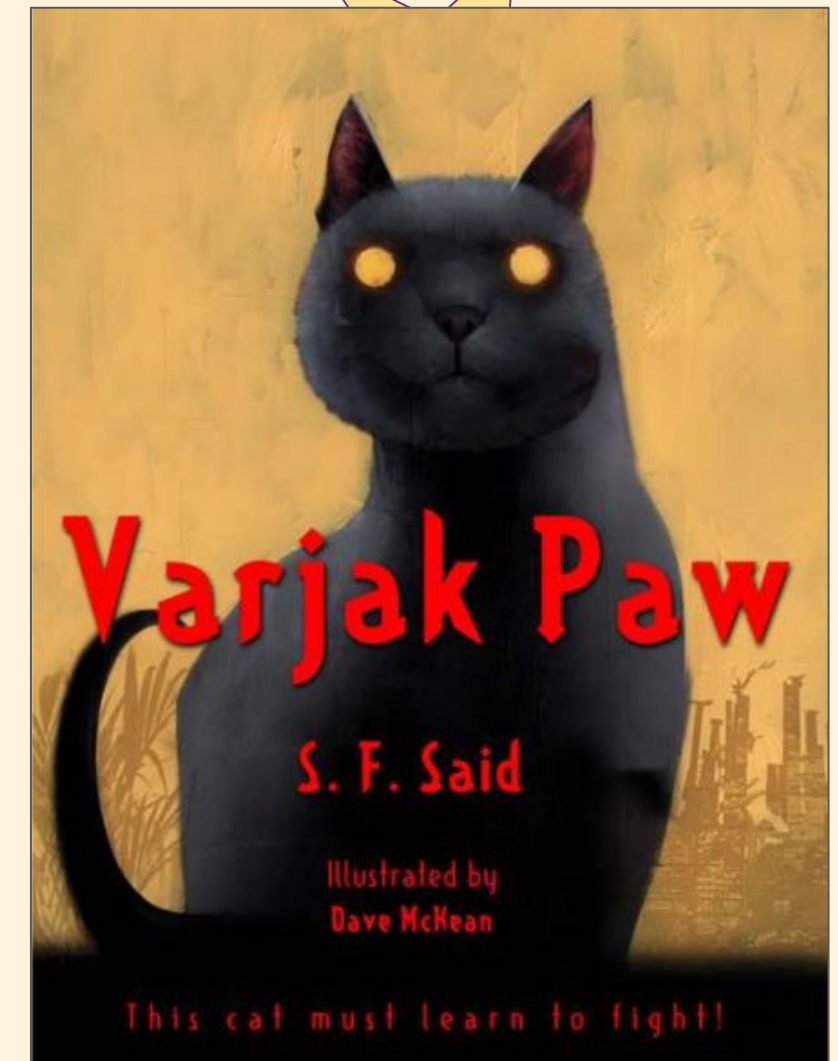

Year 5

In writing, we have started to look at free verse poetry. We identified personification, similes and metaphors in a poem about the planet Earth.

In reading, we have started to look at our new text. It is Varjak Paw by S.F.Said. We took part in a conscience alley to advise Varjak Paw.

As part of our science learning, we went outside to compare the relative size of the planets in our solar system. We put the planets in order and then looked at their gravity to see if there was a pattern.

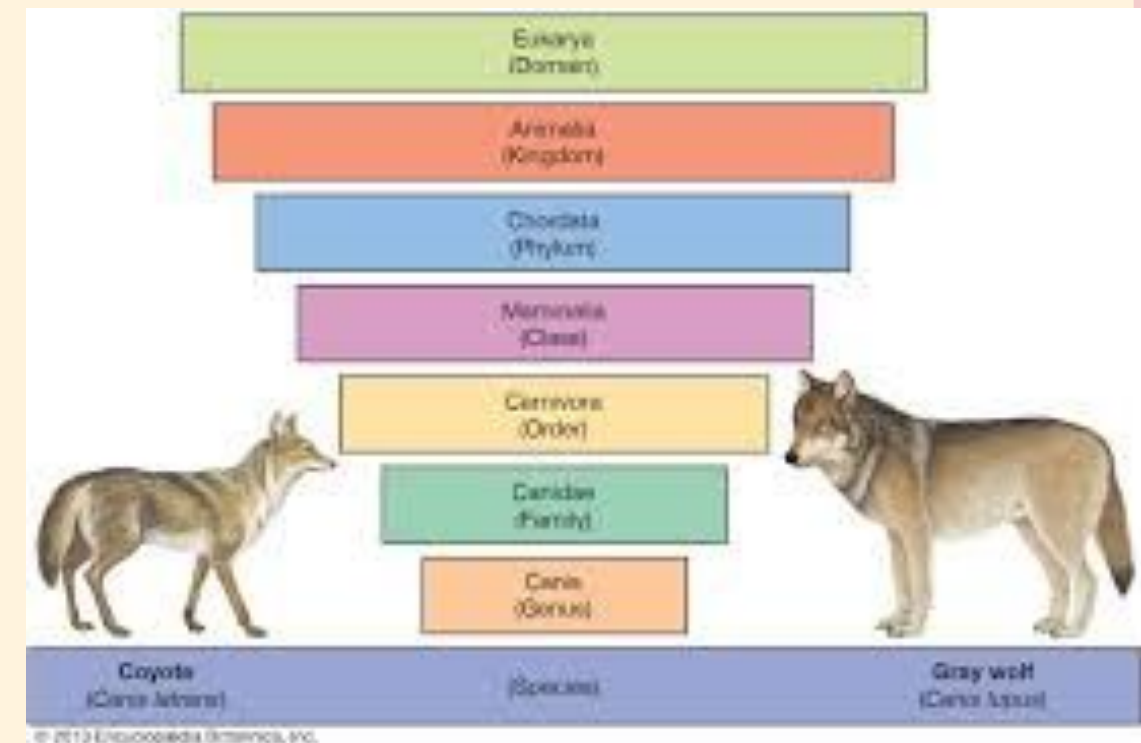

Year 6

In writing this week we have been researching our favourite animal to help make our nature documentary later in the term.

In science, we looked at the scientist Carl Linnaeus and the system he created to help group animals.

In maths, we have been learning about long division and the steps needed to help us get to the correct answer. We will keep persevering!

Thank you
