Nursery

In nursery

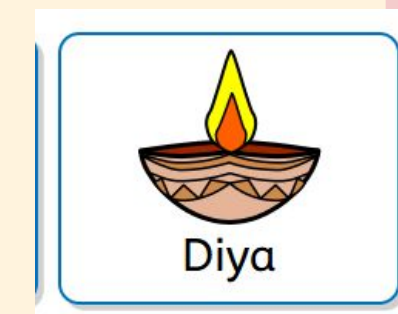

Reception

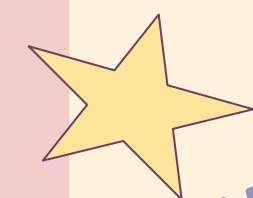

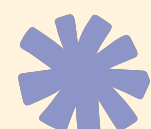

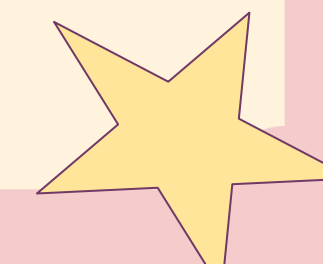

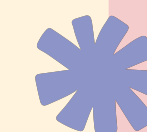

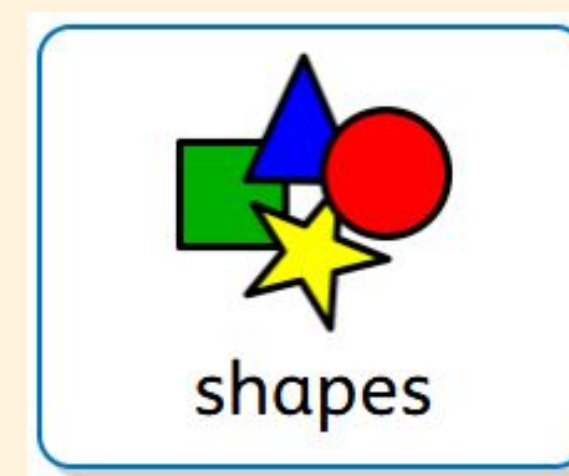

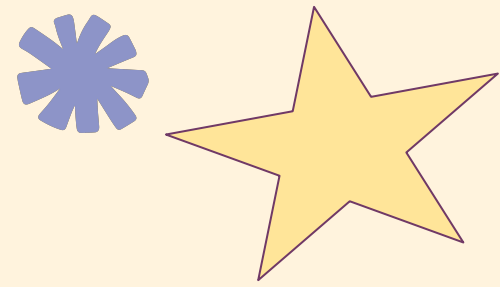

This week in Maths, we have been learning about one more. The counting puppet helped us practise counting carefully and successfully.

We also explored the celebration of Diwali and enjoyed decorating colourful diya lamps.

In provision, we have been busy practising number formation and learning the names of different shapes.

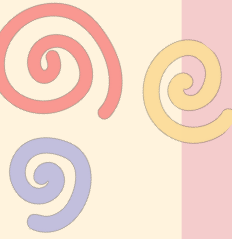

Year 1

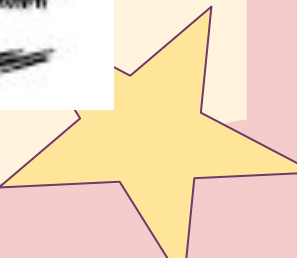

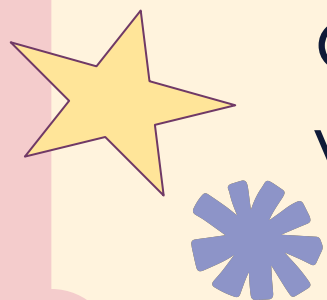

This week in English we enjoyed going on our 'lets say' journey through the forest where we were looking for the beast from our story.

In maths we have continued to develop our subtraction skills, exploring different ways to help us subtract numbers such as the crossing out method.

In art we took a line for a walk. We listened to classical music which helped us create different types of lines such as zig zags and wavy lines.

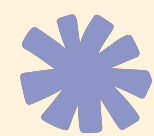

Year 2

In English we enjoyed reading and performing some poems by Michael Rosen as part of Michael Rosen Day!

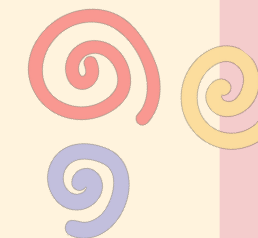

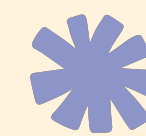

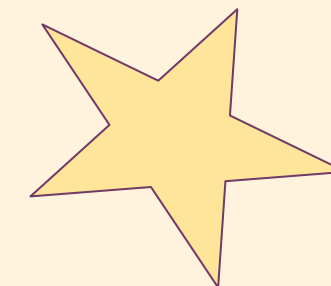

In maths we have been learning to measure length using a ruler and we can now do it very accurately.

We enjoyed going to the nature garden to gather leaves and use them to create Rangoli Patterns.

Year 3

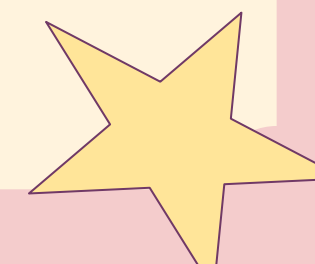

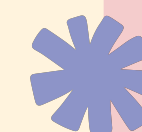

We have really impressed Miss Turner and Mrs Kirwin with our geography learning so far this half term. We know so many interesting facts about the layers of the earth.

We enjoyed celebrating Michael Rosen day yesterday and have been working hard on writing our own rhyming poem inspired by his poem 'Oh Dear!'. We can't wait to perform these next week.

In maths, we have loved recapping our times table knowledge through songs. Ask us to show you what we know!

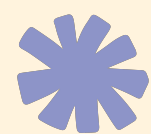

Year 4

In reading, we are enjoying reading our new book and we were all FLABBERGASTED when the Blackpool Tower vanished into thin air!

In writing, we have been working on using all of our super sentence work last week to write a short description of the scene from our film.

In geography, we have been learning all about the different layers of the rainforest and we produced some fantastic mini books with drawings and information on each layer.

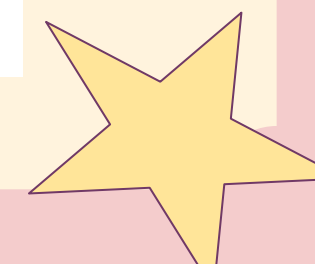

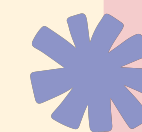

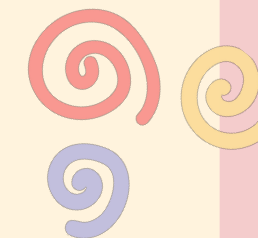

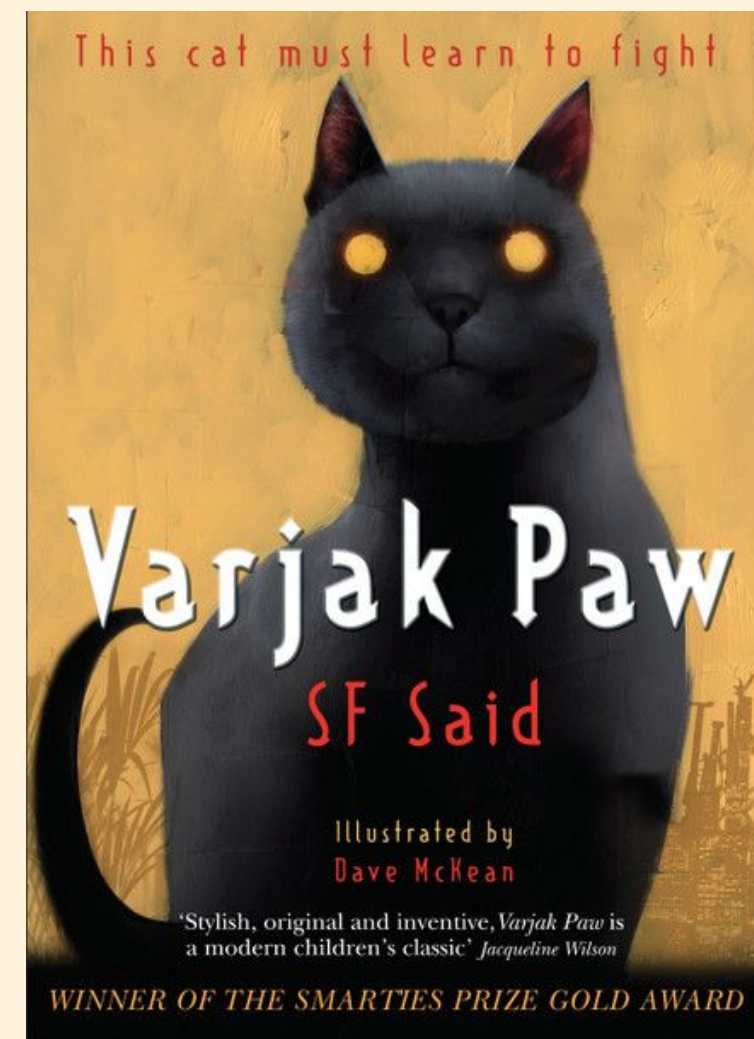

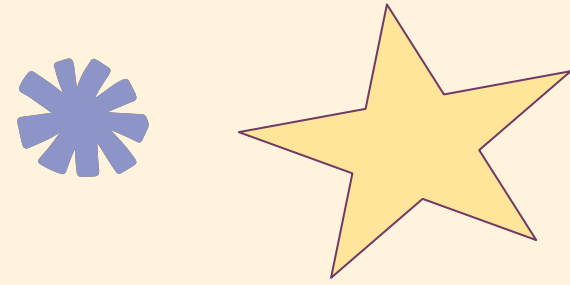

Year 5

In reading, we have continued to look at our fiction book, Varjak Paw by S.F Said. It is very exciting and has lots of suspense. At the end of each chapter, we are disappointed we can't continue and have to wait until our next reading lesson

In writing, we have started to write our own poems about the planet Mars. We are trying to use personification, metaphors and similes

We have been on a mission in maths to find the secrets of numbers, through exploration. We have enjoyed taking control of our learning journeys.

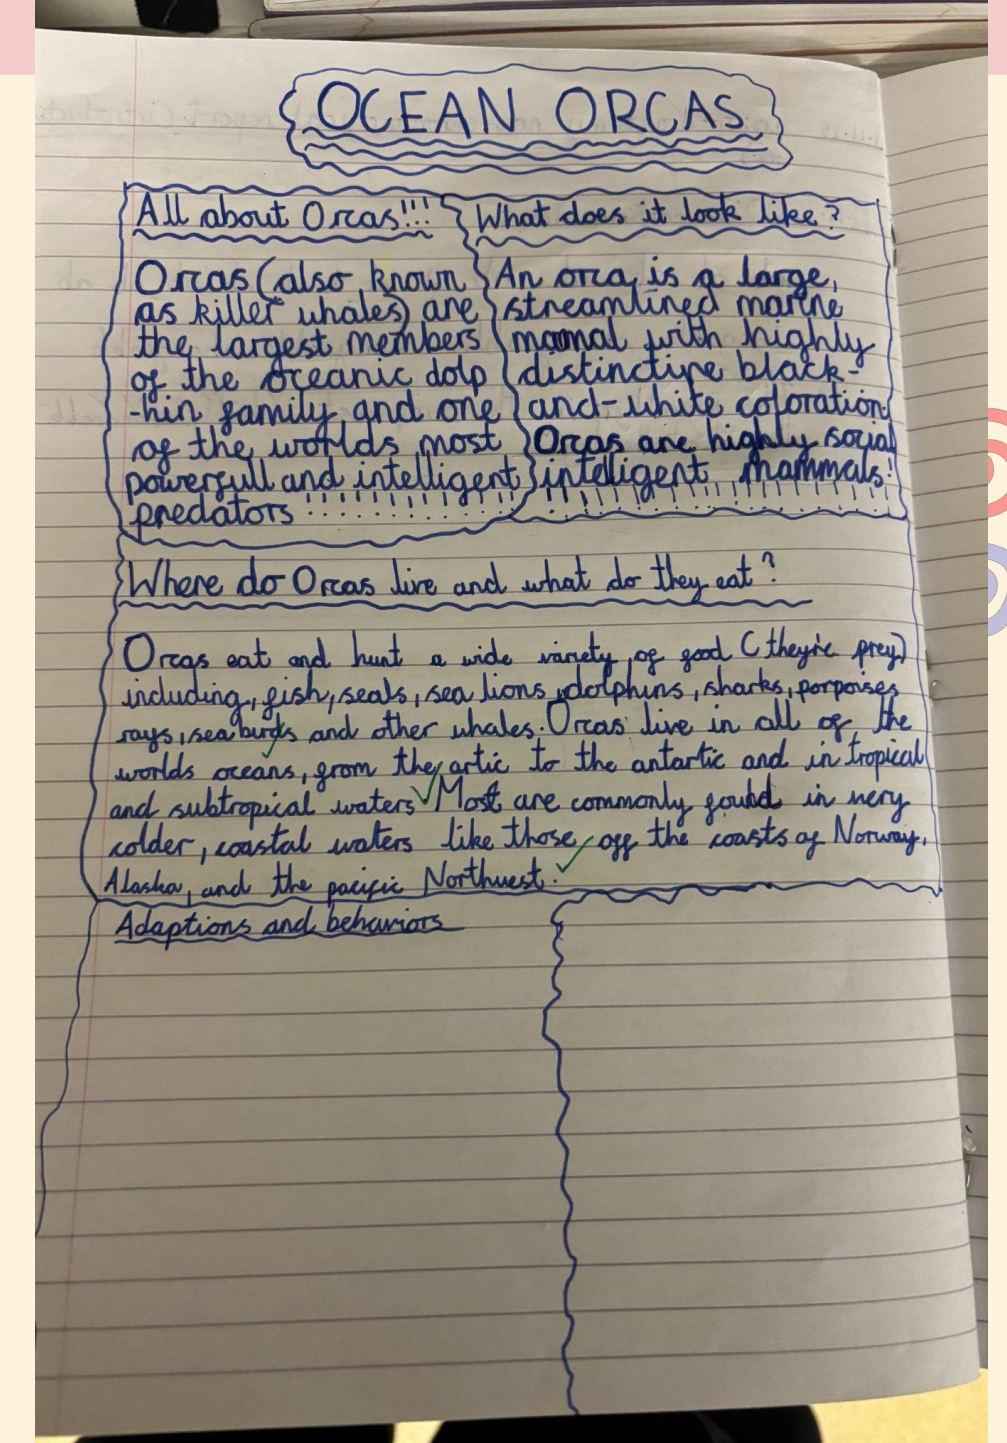

Year 6

In geography this week, we have looked at the route we are taking on our school trip to St Ives! We have looked at the coordinates of our data collection points.

In writing, we are busy working on our non-chronological reports. We are researching as much information as possible on an animal.

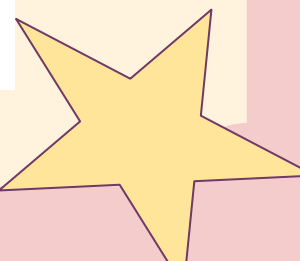

We have had our mock SATs this week and have been incredibly focused - well done to us!

Key stage 2

Mathematics

Paper 2: reasoning

Thank you
